

ZEUS NUMERIX

**The No. 1
Know-Why Company**

Defense & Aerospace
Design | Analyze | Certify

Our Offerings

Build to Specification

Zeus Numerix partners for delivering best in class performance designs that are backed by mathematical models and analysis. The engagement follows all stages of design & trial reviews culminating in products that meet specifications.

Design Approval Studies

OEMs engage us for simulation reports that support their product design claims. The studies are done in compliance to relevant military, aerospace and naval standards. These are presented to certification & QA agencies for approval.

Engineering Simulation Services

We offer on-demand CAE services for multi-disciplinary & unconventional simulation requirements. Our long experience in defence & aerospace sector allows us to choose most appropriate methods from off-the-shelf & proprietary tools.

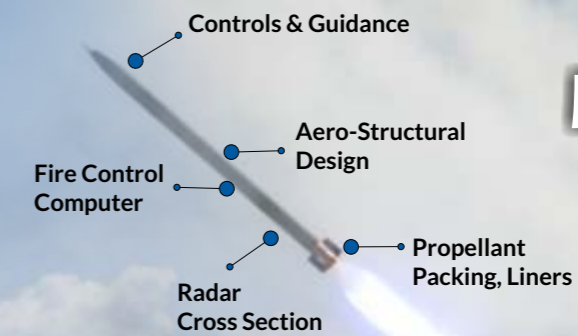

Custom Software Development

Zeus Numerix delivers analysis software for parametric design, optimization and system level operation. Our team specializes in identifying core algorithms of restricted tools and developing software as per customer / project need

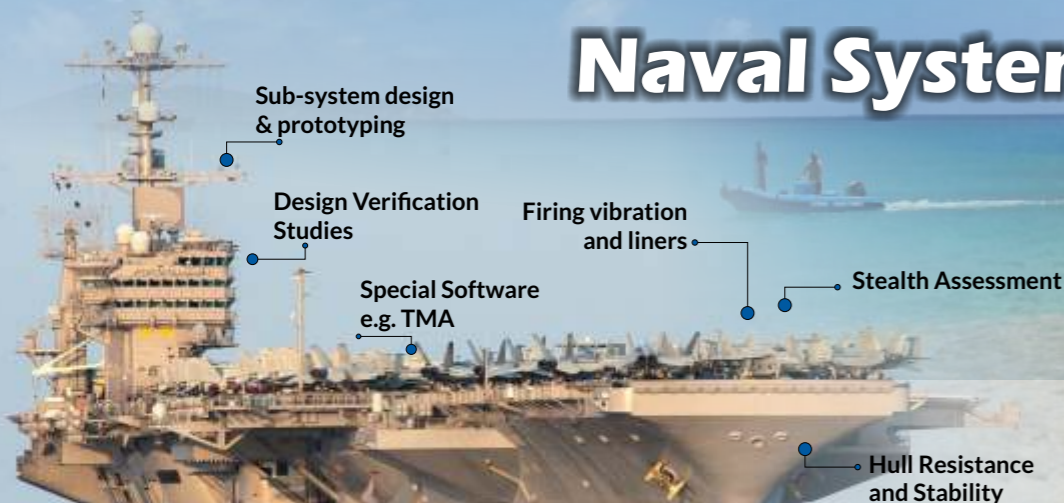

Aerospace Systems

Rockets & Missiles

Naval Systems

Land Systems

About Us

Zeus Numerix is a computer aided engineering company that offer globally competitive design solutions for defence & aerospace systems. Founded in 2004 at IIT Bombay, the company has been a leader in developing strategic IP of modeling & simulation in critical areas of system performance. The company enjoys strong partnerships with defence R&D establishments, private contractors, production agencies and users. Zeus Numerix is a DSIR recognised R&D facility and CEMILAC certified Design Approval company.

Testimonials

Have shown willingness to take technically challenging problems.
EVP - Defence Conglomerate

The results are very impressive and put the project in the right direction.
CEO and MD - Cruise Missile Establishment

I consider it a benchmark in high power computing towards FBR core thermal hydraulic.
Director - Atomic Research Facility
